WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

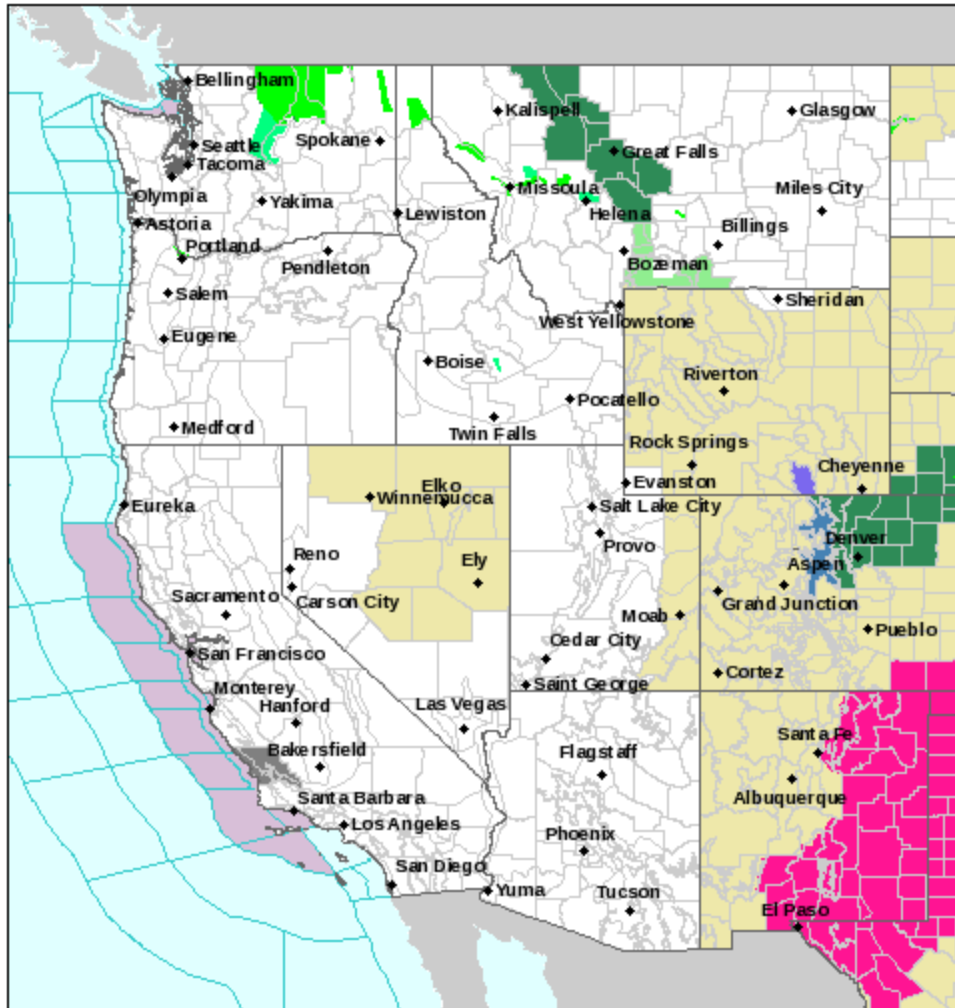

Weak high pressure to our west and low pressure to our east will produce more drier, warmer, and sunnier weather than we've seen recently, in the region today. Isolated showers and thunderstorms are only expected over the eastern mountains. Beginning Saturday a series of weak Pacific low pressure systems will impact the region and produce afternoon scattered showers and thunderstorms in the mountains in the NW, N, and E, with isolated activity possible in valleys. This pattern will continue through next Thursday. Temperatures will be within 5 degrees of normal and relative humidity will remain above 25% during this time. During afternoons SW-NW winds will gust to 20-30 mph in wind-prone areas in the coastal areas and straights and passes into inland valleys, and over higher terrain. Outflow gusts from thunderstorms could reach 35 mph.

SOUTHERN CALIFORNIA

A weak trough over the West Coast will bring near to a little below normal temperatures through this weekend, with 60s to low 70s across the mountains and mid 70s to mid 80s in the valleys. Isolated afternoon showers and thunderstorms will form over the Sierra through this weekend. Westerly afternoon and evening winds of 20 to 30 mph with gusts to 50 mph will surface across the wind prone mountain and desert areas through this weekend. An area of low pressure will form over the region Monday and stick around through Tuesday causing temperatures to cool to 5 to 10 degrees below normal. This low pressure area will also bring scattered afternoon showers and thunderstorms to the Sierra and isolated afternoon showers and thunderstorms to the mountains and deserts of Southern California. Winds will light early next week, except there will be strong and erratic winds in and near any thunderstorms. This low will be replaced with a weak trough and temperatures will warm back up to near or a little below normal Wednesday through late next week. The afternoon shower and thunderstorm threat will become isolated and become focused over the Sierra once again. Westerly afternoon and evening winds of 15 to 25 mph with gusts to 40 mph will surface across the wind prone mountain and desert areas Wednesday through the end of next week. The marine layer will be deep through the end of next week, with low clouds and fog making it over the lower coastal mountain slopes. Some light rain from the deep marine layer will be possible across the coastal and valley areas of Southern California early next week.

Cal OES LAW ENFORCEMENT MISSIONS

New Cal OES Law Missions

- **2018-LAW-46792, 05/16/18, 1531 hours:** Fresno County Sheriff's Office is requesting (2) SAR Water Human Remains Detection (HRD) K9 teams to assist in searching for a missing and presumed drowned 18 year old male, who was last seen in the San Joaquin River on 05/12/18. The requested resources are to meet for a 0900 hour briefing Friday, 05/18/18, at the San Joaquin River Gorge in Auberry. Cal OES Law Enforcement Branch (LEB) is coordinating the request. **Mission Ongoing.**

Emergency Management Assistance Compact

- **2018-Cal OES-46751:** The State of Hawaii requested one (1) Geothermal Subject Matter Expert (SME) from the California Department of Conservation, Division of Oil Gas & Geothermal Resources, to provide support to the volcanic activity occurring in Hawaii. The SME has industry and regulatory experience, as well as knowledge of geothermal wellhead construction, operations, processes, risk management, and mitigation. The SME arrived safely in Hawaii on 05/13/18, and is anticipated to return to California on 05/19/18.

Cal OES MISSION TASKING

Cal OES Missions

- **2018-IREOC-45244:** Caltrans to remove dead and dying trees along highways in Kern, Tulare, Fresno, Madera, Mariposa, Tuolumne, Calaveras, Butte, Plumas, Sierra, Shasta, and Lassen counties. (On Scene – Long-term assignment)
- **2017-SOC-44098:** CalRecycle Debris Management Team in Ventura County (Coordinating)
- **2017-SOC-43821:** DTSC to remove household hazardous waste from over 500 residential lots in Ventura County (On Scene)
- **2017-Inland-42559:** Weather station installed to gather real time rainfall data by Air Resources Control Board (On Scene)
